

Miner V4-6

Underground Articulating Forklift

Equipment North's Miner V4-6 articulating forklift is designed specifically to work in cramped, demanding underground environments. Its extremely low-emission diesel engine and compact size make it an ideal solution for material handling in mine drifts and other constricted areas.

Intuitive controls and excellent visibility make Miner V4-6 contribute to increasing productivity,

KEEPING YOUR SAFE

With a triple-redundant failsafe braking system, fire resistant wiring, and oscillating rear axle, you can rest assured the Miner V4-6 will contribute to making your mine a safe work environment.

KEY FEATURES

- ◉ MINE-APPROVED TRIPLE-REDUNDANT BRAKING SYSTEM
- ◉ MINING-TIRE EQUIPPED
- ◉ 6,000 LBS CAPACITY FORKLIFT
- ◉ HIGH LUMINOSITY LED LIGHTING
- ◉ FIRE-RESISTANT WIRING
- ◉ OPTIONAL FOLDING HEAD GUARD

COMPACT SIZE

At 6'6" tall and less than 4'5" wide, the Miner V4-6 can maneuver and work in areas that other forklifts cannot. The articulating axle ensures an extremely tight turning radius, while the oscillating rear axle keeps the unit stable, even in a tight turn.

AVAILABLE OPTIONS AND ACCESSORIES

- ◉ VARIETY OF SLIDE-ON ATTACHMENTS
- ◉ FOLDING HEAD GUARD

It is small enough to be driven into most mine cages fully-assembled. Components such as the mast and headguard are easily removable for better cageability.

SPECIFICATIONS

Engine Type	Water-cooled diesel
Engine Output	40.4 HP
Engine Displacement	2.189 L
Lift Capacity	6,000 lbs
Max. Lift Height	15'
Ground Clearance	10"
Length to Front of Carriage	10'6"
Overall Width	4' 5"
Overall Height	6' 6"
Operating Weight	8,058 lbs
Brakes	Ramp-approved fully enclosed, wet, multiple disc
Tires	73023-3-TL mining tire
Drive	4-wheel drive
Transmission	Automatic hydrostatic
Steering	Center-pivot frame articulation with full hydraulic power

Unit has been ramp tested, stability tested and meets all requirements for use underground.

Note: Specifications subject to change without notice.
